MICHIGAN MINDS
THRIVING WITH PSYCHOSIS

ETCH
EARLY TREATMENT & COGNITIVE HEALTH

What is Michigan Early Psychosis Mentor?

- Michigan Early Psychosis Mentor is a free resource aimed at supporting health professionals in working with clients experiencing early psychosis.
- The monthly call is a drop-in format and provides expert support, education, and resources to inform your work with individuals who may be experiencing early psychosis.

- The call provides an opportunity to learn in community with other health professionals. Attendees are asked to bring cases where they're feeling stuck or questions related to early psychosis presentations.

- The call is hosted by Early Treatment and Cognitive Health (ETCH), which supports training and implementation of First Episode Psychosis (FEP) services across the state, and recognizes that there are significant gaps in access to these specialized services. Michigan Early Psychosis Mentor was developed to address the scarcity of specialized services by offering consultation to support clinicians in providing psychosis-informed care.

Scheduled for the Third Wednesday of each month from 12:00-1:00 PM EST.
